

- The rapid development system of integrated products and moulds.

The Engineering department furnished with advanced PRO-E CAD/CAM/CAE software, has the ability including the conceptual design of products, reverse engineering, rapid prototyping manufacturing, rapid tools and batch production. We can supply the customer with a total solution from the development of new products to mould manufacturing. All formats of files can be received.

- Integrated Information System for Production

We use a custom software system that tracks every aspect of the design and build process to guarantee the delivery time of the mould.

- One-ticket Responsibility for Parallel Operation

We have Project Manager one-station service for order processing. Externally we communicate with customers, technical communication, timing schedule and on-site service during delivery. Internally we track tooling, timing, arrangement, process, plan, etc. This allows us to manage our processes and ensure the highest quality for the customer.

One-stop service

Design database

Highly standardized mould design

Database with basic design features, standard components, non-standard components and design modules makes tool design efficient and reliable, which will shorter designing time and improve quality greatly.
