□ The rapid development system of integrated products and moulds.

The Engineering department furnished with advanced PRO-E CAD/CAM/CAE software, has the ability including the conceptual design of products, reverse engineering, rapid prototyping manufacturing, rapid tools and batch production. We can supply the customer with a total solution from the development of new products to mould manufacturing. All formats of files can be received.

□ Integrated Information System for Production

We use a custom software system that tracks every aspect of the design and build process to guarantee the delivery time of the mould.

One-ticket Responsibility for Parallel Operation

We have Project Manager one-station service for order processing. Externally we communicate with customers, technical communication, timing schedule and on-site service during delivery. Internally we track tooling, timing, arrangement, process, plan, etc. This allows us to manage our processes and ensure the highest quality for the customer.

One-stop service from product design to batch production. Team organization base on different customers. Rapid response and regular report.

Product Reverse Rapid Rapid CAE analysis discip gauge production Service

Highly standardized mould design Database with basic design features, standard components, non-standard components and design efficient and reliable, which will shorter designing time and improve quality greatly.
